PRIORITÉS STRATÉGIQUES

1. Reduce trial churn from 63.5% via personalized onboarding nudges at J+1 and J+3. 2. Expand premium catalog on high-ARPU services to capture value-seeking segments. 3. Deploy automated re-engagement campaigns targeting the 302 high-risk subscribers identified.

PRÉVISION PRÉDICTIVE

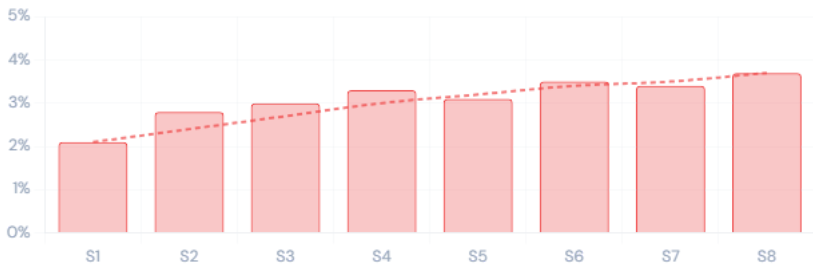

Les modeles predictifs estiment le maintien d'environ 43,214 utilisateurs actifs au prochain trimestre avec une variance de churn de ±0.3%. Croissance revenue projetee: 4-7% QoQ.

AMÉLIORATIONS KPI ATTENDUES

Projection apres execution du plan: churn 3.7% -> ~2.5%, conversion 6.8% -> ~9.3%, ROI 3.5x -> ~4.3x.

02 Churn & Rétention

ÉVOLUTION MENSUELLE DU CHURN

ANALYSE DES CAUSES RACINES

Le taux de churn global observé est de 3,7 % avec un taux de churn trial de 63,5 %. Les analyses de rétention et les cohortes sont disponibles dans les tableaux de bord.

PRÉVISION CHURN 90J

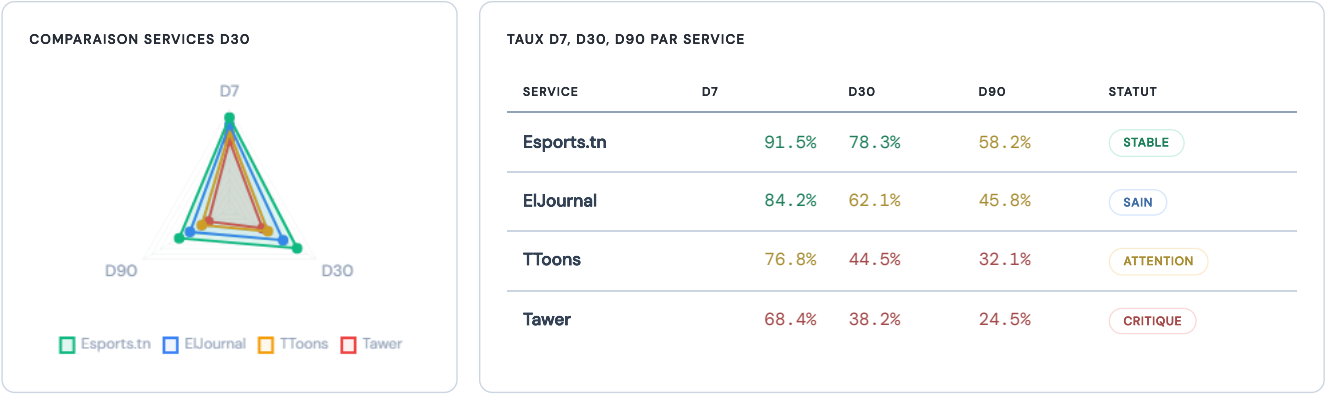

Churn is projected to remain between 3.2% and 4.2% over the next 90 days. Early re-engagement interventions at D+1 could reduce trial churn by an estimated 8-12 percentage points. Without intervention, the 302 high-risk users are projected to churn within 30 days.

Trial churn: 63.5%

D7: 45.2%

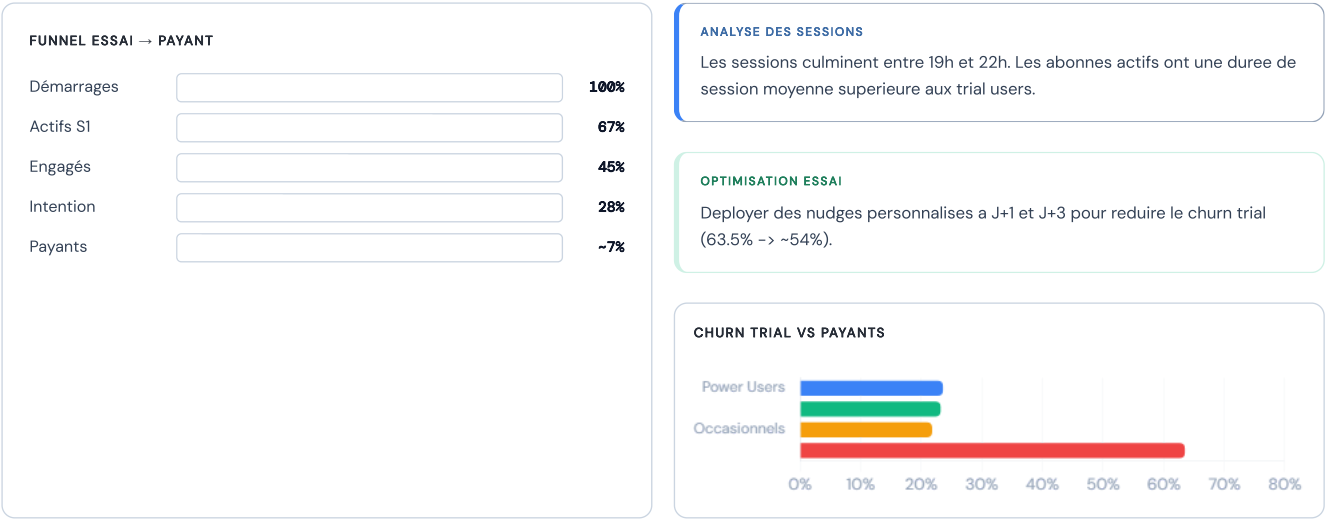

D30: 62.1%
