STRATEGIC PRIORITIES

1. Reduce trial churn from 63.5% via personalized onboarding nudges at J+1 and J+3. 2. Expand premium catalog on high-ARPU services to capture value-seeking segments. 3. Deploy automated re-engagement campaigns targeting the 302 high-risk subscribers identified.

PREDICTIVE FORECAST

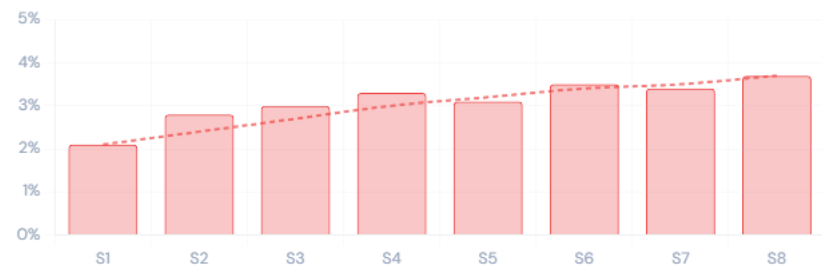

Based on current trajectory, predictive models estimate the platform will maintain approximately 43,214 active users next quarter with a churn variance of ±0.3%. Revenue growth is projected at 4-7% QoQ assuming campaign ROI holds at 3.5x.

EXPECTED KPI IMPROVEMENTS

With full recommendation adoption: Active users +5% → ~45,374. Churn rate: 3.7% → ~2.5%. ARPU: +8-12% increase. Trial conversion: 6.8% → ~9.3%. D30 retention: 62.1% → ~77%. Campaign ROI: 3.5x → ~4.3x.

02 Churn & Retention

MONTHLY CHURN EVOLUTION

ROOT CAUSE ANALYSIS

Le taux de churn global observé est de 3,7 % avec un taux de churn trial de 63,5 %. Les analyses de rétention et les cohortes sont disponibles dans les tableaux de bord.

90-DAY CHURN FORECAST

Churn is projected to remain between 3.2% and 4.2% over the next 90 days. Early re-engagement interventions at D+1 could reduce trial churn by an estimated 8-12 percentage points. Without intervention, the 302 high-risk users are projected to churn within 30 days.

Trial churn: 63.5%

D7: 45.2%

D30: 62.1%
