Insights Alimentees par l IA

Priorites Strategiques

1. Reduce trial churn from 63.5% via personalized onboarding nudges at J+1 and J+3. 2. Expand premium catalog on high-ARPU services to capture value-seeking segments. 3. Deploy automated re-engagement campaigns targeting the 302 high-risk subscribers identified.

Prevision Predictive

Les modeles predictifs estiment le maintien d'environ 43,214 utilisateurs actifs au prochain trimestre avec une variance de churn de ±0.3%. Croissance revenue projete: 4-7% QoQ.

Ameliorations KPI Attendues

Projection apres execution du plan: churn 3.7% -> ~2.5%, conversion 6.8% -> ~9.3%, ROI 3.5x -> ~4.3x.

Analyse Churn & Retention

Evolution Mensuelle du Churn

W1 W2 W3 W4

Analyse des Causes Racines

Le risque de churn est a 3.7% globalement, principalement porte par le churn trial (63.5%). La retention D7 a 45.2% suggere des frictions d'activation precoce.

Prevision Churn

Churn is projected to remain between 3.2% and 4.2% over the next 90 days. Early re-engagement interventions at D+1 could reduce trial churn by an estimated 8-12 percentage points. Without intervention, the 302 high-risk users are projected to churn within 30 days.

Cohortes de Retention

Taux de retention D7, D30, D90 par service.

Service	D7	D30	D90	Statut
Esports.tn	91.5%	78.3%	58.2%	Stable
ElJournal	84.2%	62.1%	45.8%	Sain
ttoons	76.8%	44.5%	32.1%	Attention
Tawer	68.4%	38.2%	24.5%	Critique

Comportement Essai Gratuit

Funnel Essai vers Payant

Demarrages	100%
Actifs S1	67%
Engages	45%
Intention	28%
Payants	~7%

Analyse des Sessions
Les sessions culminent entre 19h et 22h. Les abonnes actifs ont une duree de session moyenne superieure aux trial users.
Optimisation Essai
Deployer des nudges personnalisés a J+1 et J+3 pour reduire le churn trial (63.5% -> ~54%).

Segmentation IA
